

NOTES TO USERS

This map is for use in administering the National Flood Insurance Program. It does not necessarily denote all areas subject to flooding, particularly those that require special studies of small areas. The community map preparator should be consulted for possible additional flood hazard information.

To obtain more detailed information in areas where Special Flood Hazard Areas (SFHAs) and Floodways have been determined, users are encouraged to consult the Flood Profiles and Profiles Data and/or Summary of Elevation Determinations Tables contained within the Flood Insurance Study (FIS) Report that accompanies this FIRM. Users should be aware that SFHAs shown on the FIRM represent rounded shoreline elevations. These SFHAs are intended for flood insurance rating purposes only and should not be used as the sole source of flood elevation information. Anestically, flood elevation data presented in the FIS Report should be utilized in conjunction with the FIRM for purposes of construction and/or floodplain management.

Covered Area Flood Elevation shown on this map apply only to landward of 0.5 foot Annual Recurrence Interval of 1986 (ARI-0.5). Levels of the FIRM should be aware that Covered Area Flood Elevations are also provided in the Summary of Elevation Determinations Table in the Flood Insurance Study Report for the jurisdiction. Elevations shown in the Summary of Elevation Determinations Table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this map.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydrologic computations with regard to requirements of the National Flood Insurance Program. Floodway width and other pertinent floodway data are provided in the Flood Insurance Study Report for the jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.4 "Flood Protection Measures" of the Flood Insurance Study Report for information on flood control structures for the jurisdiction.

The projection used in the presentation of this map was Michigan State Plane South Zone (FIPS Zone 1713). The horizontal datum was NAD 83 GRS 1983 spheroid. Differences in datum, spheroid, projection or UTM zones used in the production of F-RMs for adjacent jurisdictions may result in slight positional differences in map features across jurisdiction boundaries. These differences do not affect the boundaries of the FIRM.

Flood elevations on this map are referenced to the North American Vertical Datum of 1985. These flood elevations must be compared to structure and ground elevations referenced to the same vertical datum. The information regarding conversion between the National Geodetic Vertical Datum of 1985 and the North American Vertical Datum of 1985, visit the National Geodetic Survey website at <http://www.ngs.noaa.gov> or contact the National Geodetic Survey at the following address:

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3042, or visit its website at <http://www.ngs.noaa.gov>.

Base map information was derived from the National Agriculture Imagery Program (NAIP) 2002 orthophoto.

The profile lines shown on this map represent the two water modeling cross-sections that define the flood profile in the FIS report. As a result of rounding geographic data, the profile lines, in some cases, may deviate slightly from the channel centerline as appear on the SFHA.

Certain data shown on this map are based on the best data available at the time of publication. Because changes due to alterations or developments may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate land locations.

Please refer to the separately printed Map Index for an overview map of the study showing the layout of map panels, community map preparator address, and a listing of Community Maps Containing National Flood Insurance Program data for each community as well as a listing of the panels on which each community is located.
